

## Communiqué officiel

Samoëns, le 03 avril 2021

Ladies and Gentlemen

In the light of the recent developments regarding the health situation, we would like to share some thoughts with you on the organisation of our event in June.

So far, there are several factors causing uncertainty:

- the rules for crossing borders are very diverse and change regularly, making it uncertain whether foreign runners will be able to come;
- the proposed health protocol has not yet been approved by the Prefecture, which will probably not take a decision until the impact of the latest national lockdown has been measured;
- our main reception area for runners has been requisitioned as a vaccination centre, until an undetermined date;
- some rooms usually used for logistics may be unavailable because of the elections, if they are held.

Thus, we consider that it is impossible to guarantee that our event will be held on the dates planned. However, since these factors of concern may still improve, it is too early to decide on a postponement. We also understand the need for everyone to plan ahead, starting with the organising team.

This is why a decision on whether to maintain or postpone our event will be taken and immediately communicated on 2 May 2021. If the factors mentioned have not changed by this date, a postponement will be announced.

This is already envisaged for 16 to 19 September 2021, in order to take advantage of better conditions.

In any case, it is important for our association that the Ultra-Trail® du Haut-Giffre takes place this year.

We will come back to you, partners, suppliers, runners, so that everyone can organise themselves in the best possible way.
